Subject: "A double blind cross over study to evaluate the efficacy of Environics anti Radiation chips in health care environment".

Dear Mr. Poddar,

This is to acknowledge Synergy Environic Ltd that Max Healthcare has successfully completed Study on Environics radiation harmonizing chip i.e a double blind crossover test was conducted at Max Healthcare shows a significant difference in pulse rate of people after using the Enviro chip.

This was a double blind crossover study on 200 people as per the protocol decided upon, to test the efficacy of the Enviro chip. The hypothesis of the study was that those having the pulse rate of above 82 show a reduction of 4-6 % after using the Enviro chip. Study showed that there was a significant reduction/improvement in pulse rate after using the Enviro Chips. The study was conducted for one month.

Best Regards

Dr. Vinita Jha
Director- Office Research
Max Healthcare
